Contents of Volume 31

Kinetic study of the oligomerization of isobutene over H-mordenite 1
L. Tiako Ngandjui and F. C. Thyrion (Louvain-La-Neuve, Belgium)

Representation of the equilibrium solubility properties of CO_2 with aqueous solutions of 2-amino-2-methyl-1-propanol 7
S. Xu, Y.-W. Wang, F. D. Otto and A. E. Mather (Edmonton, Alta., Canada)

Theoretical and experimental analysis of diffusion and polarization phenomena in sugar solutions in spiral-wound modules. 13
D. Barba, F. Evangelista and Z. He (L'Aquila, Italy)

Process simulation of the anodic oxidation of benzene to *p*-benzoquinone in a two-phase electrolyte 21
K. Scott (Middlesbrough, UK)

Effect of entrainment on distillation tray efficiency with complete vapor mixing and partial liquid mixing 31
Lu Xiulin, Li Yuan and Zhao Pei (Shanghai, China)

Batch salting-out crystallization 39
J. Nývlt (Prague, Czechoslovakia)

Closed-cycle technologies in the chemical industry. 43
A. Schmidt (Vienna, Austria)

Plate heat exchangers — method of calculation, charts and guidelines for selecting plate heat exchanger configurations 49
T. Zaleski and K. Klepacka (Gliwice, Poland)

Technical Note

Research into the kinetics of the mass crystallization process and the design of MSMPR-type crystallizers 57
K. Machej (Gliwice, Poland)

Inert gas desorption of single organic vapours from activated carbon 63
U. Eiden and E. U. Schlünder (Karlsruhe, Germany)

Measurements of vapor–liquid equilibrium, h^E and v^E for binary and ternary mixtures of methanol, ethyl iodide and toluene. 77
H.-I. Paul, Z. Atik and H. Knapp (Berlin, Germany)

Measuring device for gas/liquid flow. 87
B. Genenger and B. Lohrengel (Clausthal-Zellerfeld, Germany)

Modeling and simulation of bubble column reactors. 97
S. Schlüter, A. Steiff and P.-M. Weinspach (Dortmund, Germany)

Hold-up of Mellapak structured packings 119
P. Suess and L. Spiegel (Winterthur, Switzerland)

Optimal control of bioproduct drying with respect to product quality. 125
W. Kamiński and C. Strumiłło (Łódź, Poland)

Investigation of the flow field in deflector wheel classifiers 131
K. Leschonski and K. Legenhausen (Clausthal-Zellerfeld, Germany)

An analytical model for free convection film boiling on immersed solids 137
E. Specht, R. Jeschar and V. Heidt (Clausthal-Zellerfeld, Germany)

Corrigendum 147

Approximate isothermal drying curves of hygroscopic porous materials with given desorption isotherm 149
M. Legros, H. Imakoma, M. Yoshida and M. Okazaki (Kyoto, Japan)

Radial heat transport in packed beds at elevated pressures 157
R. J. Wijngaarden and K. R. Westerterp (Enschede, Netherlands)

Comparison of various mass transport models in multicomponent condensation 161
A. Burghardt and M. Berezowski (Gliwice, Poland)

Control of batch reactors using neural networks 173
J. M. Zaldivar, H. Hernández (Ispra, Italy) and F. Panetsos (Leganés, Madrid, Spain)

On mass transfer, dispersion, and macroscopical flow maldistribution in packed tubes 181
E. Tsotsas (Stade, Germany)

Adsorption of organic matter from a wet phosphoric acid using activated carbon: equilibrium study 191
A. Mellah, A. Silem, A. Boualia and R. Kada (Algiers, Algeria)

Experimental and theoretical studies on a new type of electrochemical reactor for waste-water treatment . . . 195
H. Bergmann, K. Hertwig and F. Nieber (Koethen, Germany)

Book Reviews 205

Study of exclusion equilibrium between a sucrose–NaCl solution and an ion exchange resin 207
R. Lewandowski and M. L. Lameloise (Massy, France)

Methanol synthesis in bubble column slurry reactors 213
S. Ledakowicz, M. Stelmachowski, A. Chacuk (Łódź, Poland) and W.-D. Deckwer (Brunswick, Germany)

Bed voidage in annular solid–liquid fluidized beds 221
M. Jamialahmadi and H. Müller-Steinhagen (Auckland, New Zealand)

Impingement-sheet mixing of liquids at unequal flow rates 229
R. J. Demyanovich and J. R. Bourne (Zurich, Switzerland)

Modelling of the kinetics of the hydrogenolysis of dimethyl succinate over Raney copper 241
D. J. Thomas, D. L. Trimm, M. S. Wainwright (Kensington, N.S.W., Australia) and N. W. Cant (North Ryde, N.S.W., Australia)

Laminar flow and heat transfer to pseudoplastic fluids in pipes 247
J. H. Liu, J. P. Yan, P. Y. Gu, L. Ye and Z. R. Pan (Hangzhou, China)

A study of the internal diffusion of gases in porous catalysts in the presence of a liquid phase 255
A. S. Kołodziej and J. Rogut (Gliwice, Poland)

Hydrodynamic and mass transfer characteristics of sectionalized aerated slurry reactors 263
J. Zahradník, L. Drápal, F. Kaštánek and J. Řezníčková (Prague, Czechoslovakia)

Letters to the Editor

Comments on linearization of equilibrium relationships in multicomponent mass transfer models 273
E. Kenig (Chernogolovka, Russia)

Reply to 'Comments on linearization of equilibrium relationships in multicomponent mass transfer models' 274
A. Górak (Łódź, Poland)

Forthcoming Meeting 275

Thermal treatment of divided solid wastes by the gas-contact process 277
M. Benali, C. Guy and J. Chaouki (Montreal, Que., Canada)

Fast reactions in rotor-stator mixers of different size 285
J. R. Bourne and M. Studer (Zurich, Switzerland)

Top-venting of flashing high-viscosity fluids 297
S. D. Morris, K. Bell and R. Oster (Ispra, Italy)

Barium sulfate precipitation as model reaction for segregation studies at pilot scale 307
T. Meyer, P.-A. Fleury, A. Renken (Lausanne, Switzerland), J. Darbellay and P. Larpin (Monthey, Switzerland)

Melting of ice in pure and saline water inside a square cavity 311
W. Schütz and H. Beer (Darmstadt, Germany)

A Gaussian-convection model for solid dispersion in slurry bubble columns 321
M. T. Ityokumbul (Devon, Alta., Canada)

Book Reviews 327

Reduction of convective heat transfer losses from flat surfaces 331
W. M. Lewandowski and H. Bieszk (Gdańsk, Poland)

On-line optimization: a hierarchical scheme for distillation column control 337
S. Ganguly and D. N. Saraf (Kanpur, India)

Dynamic behavior of a perforated-plate multistage fluidized-bed heat exchanger 349
D. Gauthier, G. Flamant (Font-Romeu, France) and D. Bonvin (Lausanne, Switzerland)

Heat transfer to liquid fluidized beds in annuli 363
M. Jamialahmadi, H. Müller-Steinhagen, B. Stellingwerf (Auckland, New Zealand) and B. Robson (Kwinana, WA, Australia)

Experimental and theoretical studies of the steady-state and dynamic behaviour of packed columns 377
G. Fieg, G. Wozny and L. Jeromin (Düsseldorf, Germany)

Hydrodynamics and heat transfer in packed beds with liquid upflow 385
A. S. Lamine, M. T. Colli Serrano and G. Wild (Nancy, France)

Corrigendum 395
